

King/Queen of the Court

Players begin by dribbling around inside the grid in any direction. Keeping their own ball under close control, they must protect it while trying to knock the other player's balls out of the grid. Once a player's ball has been knocked out, he/she watches from the outside.

Coaching Tips:

To speed up the game, continue to make the grid smaller. As the numbers get lower, you can introduce a time limit to encourage them to win. Make a second grid so the players on the outside keep active playing another game or a consolation game for second place.

Encourage tactics like players teaming up or leaving their balls in the corner then go on the attack to knock out other players' balls.
